

An abstract graphic featuring three green circles of varying sizes, each composed of concentric rings. Two thin green lines intersect at the top left, forming a triangular shape that frames the circles. The circles are positioned in the top right, middle right, and bottom right areas of the page.

Tracing The Growth Of The Global Community : A Population Forecasting Analysis

Specify The Business problem

Literature Survey

A literature survey is a method of researching existing literature and studies related to a specific topic. In the context of 'Tracing the growth of a global community' a literature survey would involve reviewing studies and articles that have been published on the topic of population and demographics, as well as studies specific population increase in cities. The literature survey would include sources such as academic journals, industry reports, and -indicators (KPIs)

In 2010, G.J developed The Estimation of international migration flow tables I Europe.

In the year 2014 Fosdick, B. K., & Raftery, A. E. researched about The Regional probabilistic fertility forecasting by modeling between-country correlations.

Gerland, P. Raftery, A. E., Ševčíková, H., Li, N., Gu, D., Spoorenberg initiated The Research of World population stabilization unlikely this century (2014).

In Intergovernmental Panel on Climate Change (2014).
Climate Change 2013: The Physical Science Basis:

Working group I contribution to the fifth assessment report of the intergovernmental panel on climate change, WMO/UNEP.

Gietel-Basten, S., & Sobotka, T. (2020). Uncertain population futures: Critical reflections on the IHME scenarios of future fertility, mortality, migration and population trends from 2017 to

2100. Godwin, J., & Raftery, A. E. (2017). Bayesian projection of life expectancy accounting for the HIV/AIDS epidemic Human Fertility Database (2019) Max Planck Institute for Demographic Research (Germany) and Vienna Institute of Demography (Austria) Vespa, J., Medina, L., & Armstrong, D. M. (2020). Demographic turning points for the United States: population projections for 2020 to 2060.
